<b>13.30 – 16.00</b>	Workshop continues, work in groups and presentation	
<b>16.00 – 17.00</b>	Senior researcher from DTU Vet presents own carrier within the area of veterinary science	

### \* Workshop on communication (4-5 hours)

Journalist Søren Schultz Jørgensen will facilitate this workshop. Søren Schultz Jørgensen is the main teacher at a very popular 'communication school' for PhD students in Denmark. He teaches the students to communicate to the media while balancing between simplification and scientific accuracy.

The goal of this workshop is to learn the young EPIZONE scientists to communicate their science and projects to a broader audience including the media. After a short presentation the workshop will continue with different group assignments, in which the young scientists can be active and benefit from networking. The specific programme will be planned in collaboration with Søren.
